Drought Communities Programme - Extension

\$2 million supporting community infrastructure and other drought relief projects

119 activities delivered in partnership with the community

69 infrastructure based projects

50 community resilience projects and events

The Drought Communities Programme - Extension provided funding to eligible councils in drought-affected regions of Australia.

Gannawarra Shire Council was successful in receiving \$1 million which was announced in December 2019, with a further \$1 million from the program announced in May 2020.

The program aimed to support local community infrastructure and other drought relief projects for communities impacted by drought. Rather than focus on two or three key projects, Council aimed to spread the funding as widely as possible to support not just the larger townships, but the smallest of our communities.

Over the past 18 months Gannawarra Shire Council, in partnership with the community, delivered 119 activities with the available \$2 million. This included 69 infrastructure based projects and 50 community resilience projects and events.

119 PROJECTS FUNDED in the Gannawarra

KERANG

- Kerang Parkrun, Improvements
